

CHAPTER 1

INTRODUCTION

1.1 Introduction

The recruitment and placement industry in India plays a significant role in connecting job seekers with employers across various sectors. With growing industrialization, globalization, and digital transformation, companies today need skilled, trained, and job-ready professionals who can quickly adapt to a competitive market. However, a gap still exists between academic learning and industry expectations, making employability a major challenge for graduates.

To address this challenge, placement consultancies and human resource (HR) service providers have become crucial in bridging this gap. They serve as a link between job seekers and employers, helping companies find the right candidates while guiding individuals toward suitable career opportunities. These agencies not only manage recruitment but also focus on career counseling, resume development, skill enhancement, and interview preparation.

One such organization that stands out in this field is Career Point Placement Services (CPPS), located in Solapur, Maharashtra. It is a well-established placement consultancy that connects talented candidates with reputed companies across multiple industries. CPPS specializes in placements in Pharma, Insurance, and Manufacturing sectors, where it has successfully placed over 763 candidates till date. Among them, 457 candidates were placed in pharma, 158 in insurance, and 148 in manufacturing sectors, reflecting the organization's strong market presence.

The present study titled “A Study on the Role of HR in bridging the gap between Job Seekers and Employers with Special Reference to Career Point Placement Services” aims to explore how HR functions as a bridge between candidates and recruiters. The research is based on practical observations and experiences during the internship at CPPS. It seeks to understand how HR professionals:

- 1) Identify and source candidates through online and offline platforms.

- 2) Shortlist applicants based on required skills and job profiles.
- 3) Conduct pre-interview sessions, mock interviews, and resume guidance.
- 4) Communicate with clients to understand their needs and expectations.
- 5) Offer continuous guidance to candidates from interview to onboarding.

This study highlights that HR professionals play a strategic and supportive role that goes beyond recruitment. They work to improve employability, enhance candidate confidence, and prepare individuals to meet industry standards while ensuring transparency and professionalism. With the growing role of technology in modern hiring, digital tools, job portals, and online interviews have transformed recruitment processes. Career Point Placement Services has adopted these advancements, making hiring faster, more efficient, and more accessible for candidates from diverse backgrounds.

Overall, the study emphasizes that Career Point Placement Services acts as a bridge that reduces the employment gap by aligning candidate skills with company requirements. Through personalized support, structured training, and continuous career guidance, CPPS significantly contributes to workforce development and employment generation in Solapur and nearby regions.

1.2 Objectives:

1. To study the role of HR in identifying and shortlisting suitable candidates at Career Point as per client requirements
2. To explore the tools and platforms used by HR to source, screen & connect candidates for job opportunities.
3. To study the support provided by HR to job seekers in resume building, interview preparation and skill development.
4. To assess how HR enhances the overall hiring experience by offering personalized career guidance and continuous support to candidates.
5. To suggest any changes if identified any.

1.3 Scope and Limitations of the Study

Scope:

1. The study focuses on the role of HR at Career Point Placement Services in bridging the gap between job seekers and recruiters.
2. Its scope covers HR activities such as shortlisting candidates, resume building, interview preparation, and career guidance.
3. The scope of the study focuses on four key sectors that is Pharma, Insurance, Banking and Manufacturing.
4. The scope of the study also includes tools and platforms used for recruitments and assessment of candidates.
5. The geographical scope includes local and regional job markets.

Limitations:

1. The findings are based only on the processes and data from Career Point and may not apply to other placement services.
2. The study does not cover external factors such as market demand, employer preferences, or economic conditions affecting recruitment.
3. The research is focused mainly on entry-level and mid-level roles, excluding top management hiring processes.

1.4 Research Methodology

The research methodology outlines the overall approach adopted to carry out the study effectively. It includes the research design, data types, methods of data collection, sampling techniques, and the sample size considered. These components help ensure the study is conducted systematically and the findings are valid and reliable.

Research Design

The present study is based on a descriptive research design. This design is chosen because it allows for a detailed understanding of the current practices followed by the HR department at Career Point Placement Services. The purpose is to analyze and describe how HR professionals play a key role in identifying, guiding, and placing job seekers to bridge the gap with recruiters. Descriptive research helps in exploring the "what," "how," and "why" aspects of HR functions during the hiring process.

Types of Data:

The study incorporates both primary and secondary data:

1. **Primary Data:** Primary Data was collected directly from HR professionals, interns, and team members through interaction, observation, and questionnaires. It provided first-hand insight into how HR processes are carried out in the company.
2. **Secondary Data:** Secondary Data was gathered from company records, HR policy documents, websites, industry articles, placement brochures, and previous project reports. It helped in understanding the background, industry trends, and contextual information about the organization.

Data Collection Methods:

The data was collected using a combination of:

- 1) Structured questionnaires, which were designed and shared through employee survey with HR executives & staff.
- 2) Direct observation of HR activities and understanding candidate's requirements through interactions.

Sampling Technique:

The study adopted the Census Sampling Technique, also known as the Complete Enumeration Method. In this method, information is collected from every member of the population instead of selecting a smaller sample. Since Career Point Placement Services has a total of 50 employees, all were included in the survey to ensure complete and accurate data collection.

This technique was chosen because the population size was small and manageable. It helps eliminate sampling errors and provides a true representation of the opinions, experiences, and practices of all HR professionals within the organization. This made the study more reliable and comprehensive.

Sample Size:

The sample size of the study consisted of 50 individuals who were directly involved in recruitment activities. This included HR executives, placement coordinators, and administrative staff who contributed valuable insights into candidate short listing, resume screening, communication with recruiters, and post-placement support.

1.5 Significance of the Study

This study holds great significance in understanding the evolving and essential role played by the Human Resource department in bridging the gap between job seekers and recruiters. In today's competitive job market, many qualified candidates remain unemployed not due to a lack of talent, but due to a mismatch between employer expectations and candidate readiness. This project aims to highlight how HR professionals at Career Point Placement Services act as a bridge to close this gap and ensure the right talent reaches the right opportunity.

By studying the internal HR practices, tools, and platforms used for sourcing, screening, and guiding candidates, this project throws light on the effectiveness of career support systems. It showcases how HR is not just a recruiting department, but also a support system that evaluates candidate potential, prepares them for interviews, helps build resumes, and gives career direction.

The findings of this study are valuable for:

- 1) Job seekers, who can understand how to become more job-ready.
- 2) HR professionals, who can adopt best practices for improving placement services.
- 3) Recruiters, who can benefit from a well-prepared and filtered pool of candidates.
- 4) The organization, as it can improve its placement success rate and client satisfaction.

Additionally, the study is significant for educational institutions and training centers, as it emphasizes the need for collaboration between academia and industry. By understanding what employers expect and what skills are lacking among graduates, colleges can update their curriculum and training modules accordingly. This ensures that students are better prepared for real-world challenges even before they enter the job market.

Furthermore, the research provides a practical insight into modern HR practices adopted by consultancies like Career Point Placement Services. It reflects how digital recruitment tools, communication platforms, and data-driven decisions have

transformed the traditional hiring process. By highlighting these trends, the study serves as a useful reference for future researchers, organizations, and policymakers who aim to strengthen employability and bridge the persistent gap between education and employment.

Overall, the study contributes to the larger understanding of how HR interventions can reduce unemployment, enhance employability, and strengthen industry-academic linkage through better placement strategies.

CHAPTER 2

COMPANY PROFILE

2.1 Introduction to the Organization.

Career Point Placement Services (CPPS) is one of the most reputed and rapidly growing placement consultancies in India. Headquartered in Solapur, Maharashtra, the company has been successfully bridging the gap between job seekers and employers for over 16 years. CPPS specializes in providing end-to-end recruitment, staffing, training, career counselling, and manpower solutions across diverse industries such as Pharmaceutical, BFSI (Banking, Financial Services & Insurance), and Manufacturing.

With over a decade of dedicated service in the HR and recruitment domain, CPPS has earned a strong reputation for its quality-driven and result-oriented approach. The company has built long-term relationships with both corporate clients and job seekers, positioning itself as a trusted intermediary that ensures the right match between talent and organizational requirements. Its focus on candidate preparation, job readiness, and industry alignment makes it stand out from other consultancies in the region.

In the financial year 2024–25, CPPS achieved remarkable success by placing 763 candidates, which included 457 in the pharma sector, 158 in insurance, and 148 in manufacturing. This milestone demonstrates the consultancy's strong client network and expertise in understanding sector-specific requirements. With a dedicated team of 35 full-time employees and freelancers, CPPS continues to expand its operations by adding new clients and adopting modern HR tools and practices. Some of the newly added clients include Cipla Pharma Ltd., Aurobindo Pharma, Ajanta Pharma, Kotak Life Insurance, Shilpa Bio-Science, and Raichem Pharma.

To ensure candidates are well-prepared before facing interviews, the company has recently introduced new tools and activities that help in improving candidate performance and confidence. These include:

- 1) Providing client introduction videos and specific role job descriptions (JDs) to candidates.
- 2) Sharing interview preparation question-and-answer sheets.
- 3) Offering detailed client and company information before the interview process.
- 4) Conducting pre-interview guidance sessions for better readiness.

These innovative practices have helped CPPS enhance the quality of candidate placements and increase employer satisfaction. The consultancy not only focuses on matching skills but also on improving employability through training, resume-building, and communication skill development.

Over the years, CPPS has become a one-stop solution for both job seekers and recruiters, offering professional support in every step of the recruitment process — from candidate sourcing to onboarding. Its mission is to create a platform where organizations can find capable professionals while helping individuals achieve their career goals.

In conclusion, Career Point Placement Services stands as a strong pillar in the regional recruitment ecosystem of Solapur. By consistently adapting to changing market demands, integrating technology in hiring practices, and maintaining a people-first approach, CPPS continues to strengthen its role as a reliable bridge between talent and opportunity.

2.1.1 Background and Inception of the Company

Career Point Placement Services (CPPS) was established in 2008 in Solapur, Maharashtra, with a clear vision to bridge the growing gap between qualified job seekers and the rising talent demands of industries. The company was founded by a group of HR professionals and industry experts who identified the challenges faced by both employers and candidates in finding the right fit. With a deep understanding of recruitment dynamics and career development, CPPS began its journey as a small consultancy focusing primarily on local placements within the manufacturing and pharma sectors.

Over time, with consistent performance, professional ethics, and a client-centric approach, CPPS expanded its reach across Maharashtra and other parts of India. The firm gradually diversified its services into pharmaceutical, insurance, manufacturing, FMCG, and IT sectors, catering to both entry-level and senior management positions. Its ability to adapt to market trends and maintain strong relationships with leading corporates has made it a preferred partner for recruitment and HR solutions.

The company's steady growth can be attributed to its structured recruitment process, dedicated team of experts, and continuous adoption of innovative HR tools. Career Point Placement Services has not only helped thousands of candidates secure suitable employment but has also assisted organizations in reducing hiring time and improving workforce quality.

Today, CPPS stands as a trusted name in the HR industry, known for its transparency, reliability, and people-oriented approach. With more than 16 years of experience and a record of successfully placing over 13,000 candidates across sectors, the company continues to contribute significantly to employment generation and skill enhancement. It remains committed to expanding its operations, upgrading its services with digital recruitment tools, and maintaining its position as one of the leading placement consultancies in Western India.

Milestones in the company's growth include:

- 1) 2011: Expansion to 350 sq. ft. with 10 recruiters and 7 insurance clients.
- 2) 2013: Increased to 750 sq. ft. office, serving 20 recruiters and 15 clients in insurance, banking, and pharma sectors.
- 3) 2015: Launched Excel Financial Solution for loan collection services.
- 4) 2017: Formed Excel Career Management for training and career consultancy.
- 5) 2019-2021: Established Laxmi Financial Solution and Excel Engineering Solution to diversify services.
- 6) 2023: Achieved ISO 9001:2015 certification, promoted 6 employees as business partners, and added 10 new clients.

These milestones reflect the steady and strategic growth of Career Point Placement Services over the years. From a small recruitment firm to a multi-service organization with a national presence, CPPS has continuously evolved to meet the changing demands of the job market. Its commitment to quality, innovation, and client satisfaction has been the driving force behind its success, positioning it as one of the most trusted and result-oriented placement consultancies in India.

2.1.2 Ownership Pattern

Career Point Placement Services is a privately owned partnership firm.

The company is managed under the dynamic leadership of Mr. Ramesh D. Waychal (Managing Director) along with business partners who oversee different domains such as Insurance, Pharma, and Manufacturing recruitment.

The leadership team includes:

- 1) Mr. Umakant Yelka – Business Partner (Insurance Domain)
- 2) Mr. Mohsin Shaikh – Business Partner (Insurance Domain)
- 3) Ms. Karishma Saifan – Business Partner (Pharma Recruitment)
- 4) Mr. Kausar Mulla – Business Partner (Pharma Recruitment)
- 5) Ms. Amruta Salunke – Business Partner (Pharma Recruitment)
- 6) Mr. Abhishek Gangareddy – Business Partner (Manufacturing Domain)
- 7) Ms. Rozina Sayyed – Sr. Talent Acquisition Manager

This structure allows CPPS to maintain flexibility, strong client relationships, and high-quality recruitment services across multiple industries.

2.1.3 Nature of the Business Carried

Career Point Placement Services is primarily engaged in recruitment and human resource consulting. The company's core activities include:

- 1) Sourcing and screening candidates for client companies.
- 2) Conducting preliminary interviews and preparing candidates for final interviews.
- 3) Providing career guidance and resume improvement support.
- 4) Coordinating between employers and job seekers throughout the hiring process.
- 5) Conducting job fairs and walk-in interviews in collaboration with client organizations.

The company acts as a bridge between job seekers and recruiters, specializing in talent sourcing, candidate readiness, and end-to-end hiring coordination. CPPS has recently introduced new tools to enhance candidate training and interview preparation, such as sharing client-specific information, client introduction videos, job descriptions (JDs), and curated interview question and answer sets — a practice designed to improve candidate confidence and performance.

2.1.4 Vision, Mission, and Quality Policy

Vision:

To be recognized as the most trusted and result-oriented placement service provider, bridging the gap between employers and job seekers through professionalism, integrity, and people-centric solutions.

Mission:

- 1) To deliver efficient, ethical, and high-quality recruitment solutions.
- 2) To continuously enhance client satisfaction through reliable services.
- 3) To support job seekers in achieving their career goals through counselling and training.
- 4) To maintain long-term partnerships with clients by providing the best talent in the market.

Quality Policy:

CPPS is committed to providing quality placement services through structured recruitment processes, transparent communication, regular candidate follow-ups, and continuous skill development. The firm adheres to professional and ethical standards and strives for long-term success for both clients and candidates.

2.1.5 Types of Products and Services

Career Point Placement Services provides a wide range of HR and placement services, which include:

- 1) Permanent and contractual staffing solutions.
- 2) Candidate sourcing and screening.
- 3) Resume building and interview preparation support.
- 4) Client-company introduction and detailed job role explanation.
- 5) Providing interview question-answer sheets and mock interviews.
- 6) Sector-wise specialized placements in Pharma, Insurance, and Manufacturing industries.

Recently, the company has also started using digital tools and structured communication systems such as emails, WhatsApp updates, and Google Sheets for tracking and managing recruitment processes effectively.

2.2 Market Scenario

2.2.1 Area of Operation – Global / National / Regional

Career Point operates primarily at the regional level, with its base in Solapur, Maharashtra. However, through digital platforms and partnerships with major companies like Cipla Pharma Ltd., Aurobindo, Ajanta Pharma, Kotak Life Insurance, Shilpa Bio-Science, and Raichem Pharma, the consultancy has expanded its network to other cities and states, giving it a semi-national presence in the recruitment domain.

2.2.2 Competitors Information

In the recruitment and HR consultancy market, Career Point Placement Services operates in a competitive environment where several local and national players offer similar services. The competition mainly arises from two categories — local consultancy firms and online recruitment platforms.

1. Local Competitors (Solapur and Regional Level)

At the regional level, Career Point Placement Services faces competition from small and mid-sized recruitment consultancies that cater to specific sectors like pharma, insurance, and manufacturing. These consultancies often have limited reach but offer personalized services within their local areas.

Some examples of local competitors include:

- 1) Perfect Placement Consultancy, Solapur
- 2) Shree HR Services
- 3) Global HR Consultancy
- 4) Unique Jobs Placement, Solapur

These local firms mainly focus on sourcing candidates through local references, newspaper ads, and small job fairs. However, Career Point stands out by using more structured tools, digital communication systems, and client introduction materials, making its recruitment process more organized and professional.

Competitive Edge Over Local Firms:

Career Point provides end-to-end support including resume building, mock interviews, and job role training, which most local consultancies lack. It maintains long-term tie-ups with reputed companies like Cipla Pharma, Ajanta Pharma, Kotak Life Insurance, and Shilpa Bio-Science. The firm also uses technology-driven methods (Google Sheets, online tracking systems, WhatsApp updates) to maintain candidate and client data efficiently.

2. National-Level and Online Competitors

Apart from local competition, Career Point also competes with national and digital recruitment platforms that have a strong presence across India. These platforms include:

- 1) Naukri.com: India's largest online job portal that connects millions of job seekers and recruiters. It allows companies to post jobs and candidates to apply directly. However, it lacks the personal guidance and interview preparation support that Career Point provides.
- 2) Indeed.com: A global job search engine that lists jobs from various industries. While it offers wide reach, it does not offer human interaction or customized shortlisting services.
- 3) Shine.com: Another well-known job portal that focuses on professional roles. Shine's model is more technology-based and less relationship-oriented compared to Career Point's personal approach.
- 4) LinkedIn: A professional networking platform where companies and recruiters can post vacancies and connect directly with candidates. Although powerful, it primarily benefits skilled professionals and corporate-level hiring rather than entry- or mid-level roles where Career Point specializes.

Competitive Edge Over Online Platforms:

Career Point ensures personalized attention and mentorship to each candidate, unlike online platforms that are automated. It offers end-to-end recruitment assistance, from job search to onboarding, which online portals do not provide. The consultancy's

strong local network and client trust help in faster and more reliable placements, especially in the pharma, insurance, and manufacturing sectors.

3. Overall Competitive Advantage

Career Point Placement Services holds a distinct competitive advantage because it combines the local reach and personalized approach of small consultancies with the efficiency and professionalism of larger firms.

By continuously updating its tools — such as client introduction videos, interview question sheets, and job-specific JD sharing — Career Point ensures better preparation for candidates and higher satisfaction for clients. This integrated model has helped it maintain strong relationships and achieve over 763 successful placements across multiple sectors till 2025.

2.2.3 Achievements / Awards (if any)

Career Point Placement Services (CPPS) has received several prestigious awards and recognitions for its outstanding performance in the recruitment and consultancy field. These achievements highlight the company's consistent growth, professionalism, and client satisfaction.

The major recognitions received by CPPS are as follows:

- 1) Year 2010: Received the “January Ka Josh” Award from HDFC Life Insurance for being the Topper in Maharashtra, Goa, and Gujarat.
- 2) Year 2010–11: Honored with the Gold Consultant Award by HDFC Life Insurance for excellent performance in recruitment services.
- 3) Year 2010–11: Achieved the Top in Pan India FLS Recruitment Award 2010–11 from Birla Sun Life Insurance for remarkable national-level performance.
- 4) Year 2011–12: Again received the Gold Consultant Award from HDFC Life Insurance for maintaining high-quality recruitment outcomes.

- 5) Year 2012–13: Awarded the Best Consultant Award by Max Life Insurance for outstanding consultancy services.
- 6) Year 2012–13 (Sept–Dec): Honored with the Best Consultant Award from Abbott Healthcare for exceptional recruitment achievements.
- 7) Year 2012–13 (Sept–Dec): Also received the Best Consultant Award from HDFC Bank for consistent performance and service excellence.

Recent Achievement (2024-2025):

As of the year 2024–25, Career Point Placement Services has successfully placed 763 candidates across its core operational sectors, reflecting its continued growth and efficiency in fulfilling diverse industry requirements.

- 1) Pharmaceutical Sector: 457 candidates placed
- 2) Insurance Sector: 158 candidates placed
- 3) Manufacturing Sector: 148 candidates placed

This consistent performance showcases the company's strong focus on targeted recruitment, client satisfaction, and industry specialization.

Recent Client Additions:

Career Point continues to expand its client base across key sectors, adding several reputed organizations in the recent financial year.

- 1) Pharmaceutical: Cipla Pharma Ltd, Aurobindo Pharma, Ajanta Pharma
- 2) Insurance: Kotak Life Insurance
- 3) Manufacturing: Shilpa Bio-Science, Raichem Pharma

These collaborations underline the growing trust of leading organizations in Career Point's recruitment expertise and its proven ability to deliver quality manpower solutions across India.

2.3 Various Departments in the Organization

Career Point Placement Services is structured into the following key departments for smooth and efficient operations:

1) HR & Recruitment Department:

Responsible for sourcing candidates, coordinating interviews, maintaining client relations, and managing databases.

2) Training & Development Department:

Handles candidate preparation activities including resume improvement, mock interviews, and communication skills enhancement.

3) Client Coordination Department:

Manages interactions with client companies, understanding their requirements, and ensuring timely candidate placements.

4) Administration Department:

Takes care of documentation, office management, and internal coordination.

5) Marketing & Business Development Department:

Focuses on bringing in new clients and maintaining relationships with existing ones. It also handles promotional activities and branding.

Currently, the company has a team of 35 employees. In the upcoming year 2025–26, the firm plans to expand its team and departmental structure further to manage the growing client base.

2.4 Organization Chart

CHAPTER 3

THEORETICAL BACKGROUND

3.1 Brief Review of Literature

The review of literature forms the foundation of any research study as it provides insights from previous works, theories, and empirical studies related to the topic. It helps in understanding how Human Resource (HR) professionals contribute to bridging the gap between job seekers and recruiters. The review explores various studies conducted by scholars and practitioners, focusing on areas such as employability enhancement, skill development, recruitment strategies, and candidate preparedness. It also highlights how HR acts as a strategic link in aligning candidate capabilities with industry needs. The following studies present key findings and perspectives that support the objectives of the current research.

1) Sharma (2018)

According to Sharma (2018) in his book **“Human Resource Practices and Employability Enhancement”** published by Pearson Education, many job seekers lack soft skills and interview preparation, which becomes a major obstacle in securing employment. The study emphasizes that HR professionals play a crucial role in providing pre-interview guidance, mock sessions, and communication training. This support helps candidates gain confidence and present themselves effectively before employers.

2) Saxena & Kumar (2020)

Saxena and Kumar (2020) in their study published in the International Journal of Management and Social Science Research Review titled **“Career Counseling and HR’s Role in Matching Talents with Industry Needs”** highlight the importance of career counseling and assessment tools in identifying the strengths and weaknesses of job seekers. Their research suggests that HR departments should not only focus on recruitment but also act as mentors who guide individuals towards roles that match their skills and interests.

3) Mehta (2019)

Mehta (2019) in the Journal of Human Resource and Development Studies published a paper titled **“The Impact of Structured Recruitment Processes on Candidate Success Rates”**. The study observed that placement agencies adopting structured processes like resume building, skill testing, and pre-screening are more successful in placing candidates. The study shows that these steps create a balance between educational qualifications and industry expectations.

4) Choudhary (2021)

Choudhary (2021) in his article **“Post-Recruitment HR Practices and Employee Retention”** published in the Indian Journal of Organizational Behavior found that continuous mentoring and post-placement feedback from HR departments significantly enhance employee retention and performance. The study underlines that the HR function extends beyond recruitment—it also includes nurturing long-term professional growth through onboarding support and follow-ups.

5) Verma & Singh (2022)

Verma and Singh (2022) in their book **“Digital Transformation in Human Resource Management”** published by McGraw Hill Education stress the growing role of technology in recruitment and candidate engagement. Their study explains that digital platforms and HR analytics have improved the accuracy of candidate selection. However, the human touch provided by HR professionals remains vital in assessing emotional intelligence and cultural fit—key elements that algorithms cannot fully evaluate.

Summary:

From the above review, it can be concluded that HR professionals play a multi-dimensional role in bridging the gap between job seekers and recruiters. They not only perform recruitment activities but also act as mentors, trainers, and coordinators who ensure that candidates are industry-ready. The collective findings of these studies support the view that proactive HR involvement is essential for reducing employment gaps and achieving effective workforce alignment.

3.2 Conceptual Framework

The conceptual framework of this study is based on the idea that HR functions as a connector or bridge between two important entities in the employment ecosystem — job seekers and recruiters. This framework has been developed using insights from existing literature, practical observations, and real-time experiences gained during the internship at Career Point Placement Services.

The framework represents the systematic process through which HR professionals identify, prepare, and connect candidates with suitable job opportunities. It captures how HR practices contribute to effective placement, skill alignment, and career growth. The process includes several interconnected stages as discussed below:

1) Sourcing & Shortlisting:

HR professionals identify potential candidates using job portals, professional networking sites, referrals, and internal databases. They carefully review resumes, qualifications, and experience levels to ensure they meet the specific requirements of client organizations. This stage ensures that only relevant and capable candidates proceed further.

2) Screening & Evaluation:

Candidates undergo a preliminary screening process where their technical knowledge, communication skills, and overall employability are assessed. Tests, mock interviews, and psychometric evaluations may be conducted to determine readiness and cultural fit for the organization. This ensures a better match between candidate potential and recruiter expectations.

3) Training & Development:

HR departments often provide training sessions covering resume writing, interview skills, grooming, personality development, and workplace etiquette. Such initiatives improve job readiness and confidence among candidates. The objective is to prepare them not only for selection but also for long-term success in the workplace.

4) Guidance & Counseling:

HR professionals offer personalized counseling sessions to help candidates make informed career choices. By understanding their aspirations, interests, and market demands, HRs can guide them toward the most suitable job roles. This step also helps in building trust and motivation among job seekers.

5) Recruiter Coordination:

HR maintains direct communication with recruiters to understand their requirements, job descriptions, salary structures, and timelines. Based on this understanding, they recommend the most suitable candidates and schedule interviews. Regular coordination ensures transparency and smooth progress in the hiring cycle.

6) Continuous Support:

Even after a candidate is selected, HR continues to offer assistance by facilitating offer letter discussions, joining formalities, and post-placement follow-ups. They also collect feedback from both recruiters and candidates to ensure satisfaction and identify areas of improvement for future placements.

This conceptual framework highlights a cyclical relationship among HR, job seekers, and recruiters. HR professionals not only act as mediators but also as facilitators of growth and development. The framework emphasizes that by combining communication, skill development, and coordination, HR can effectively reduce employment mismatches.

Ultimately, the conceptual model suggests that effective HR intervention leads to higher placement success, better candidate satisfaction, and improved organizational efficiency. By continuously engaging with both parties, HR professionals build long-term professional relationships, enhance employability, and bridge the gap between talent availability and organizational needs.

CHAPTER 4

DATA ANALYSIS

Table 4.1 - Table Showing Age group of HR Professionals.

Age Group	No. of Respondents	Percentage
Below 25	17	34%
25-34	20	40%
34-44	8	16%
45 and above	5	10%
Total	50	100%

Graph 4.1 - Graph Showing Age group of HR Professionals

Interpretation :

The 40% of HR professionals fall under the age group 25-34, showing that young professionals dominate the HR field. Around 16% belong to the 34-44 age group, while only 10% are above 45 years. This indicates that HR departments are largely managed by young people who are under 34 years of age. Overall, the data suggests a youthful and dynamic HR workforce.

Table No. 4.2-Table Showing Distribution of Respondents by Gender

Gender	No. of Respondents	Percentage
Male	19	38%
Female	31	62%
Total	50	100%

Graph No. 4.2 - Graph Showing Distribution of Respondents by Gender**Interpretation :**

The gender distribution reveals that 62% of the respondents are female, while 38% are male. This highlights a higher female participation in HR roles compared to males. The HR profession is often perceived as people-oriented, attracting more women. Thus, women continue to play a leading role in human resource management

Table No. 4.3 - Table Showing Distribution of Respondents based on Years of Experience

Years of Experience	No. of Respondents	Percentage
Less than 1 year	17	34%
1 - 3	15	30%
3 - 5	12	24%
More than 5 years	6	12%
Total	50	100%

Graph No. 4.3 - Graph Showing Distribution of Respondents based on Years of Experience

Interpretation :

The data indicates that, 34% of respondents have less than one year of experience, showing a large proportion of new entrants in the organization. Around 30% have 1–3 years of experience, reflecting early-career professionals gaining stability. About 24% possess 3–5 years of experience, while 12% have more than five years, indicating experienced staff. This shows a balanced mix of fresh talent and experienced employees in the organization.

Table No. 4.4 - Table showing Designation of Respondents

Designation	No. of Respondents	Percentage
Trainee Talent Acquisition Executive	12	24%
Senior Trainee Talent Acquisition Executive	12	24%
Talent Acquisition Manager	14	28%
Senior Talent Acquisition Manager	5	10%
Business Partner	7	14%
Total	50	100%

Graph No. 4.4 - Graph Showing Distribution of Designation of Respondents**Interpretation :**

The study shows that, 28% of respondents are Talent Acquisition Managers. Trainee Executives and Senior Trainees each make up 24%. This reflects a balanced mix of junior and mid-level HR positions. A smaller number of respondents hold senior roles, indicating a growing hierarchy.

Table No. 4.5 - Table Showing Preferred Mode of Collecting Job Requirements from Clients

Method of Collection	No. of Respondents	Percentage
Emails	36	72%
Meetings	2	4%
Calls	5	10%
Client Discussion	7	14%
Total	50	100%

Graph No. 4.5 - Graph Showing Preferred Mode of Collecting Job Requirements from Clients

Interpretation :

The data shows that, 72% of HR professionals prefer collecting job requirements through emails, 10% through calls, and 14% through client discussion. This implies that written communication is the most trusted and efficient method for clarity and record-keeping. Email communication ensures transparency and avoids miscommunication. Therefore, HRs rely more on digital communication for requirement collection.

Table No. 4.6 - Table Showing the Factors Considered by HR While Shortlisting Candidates for Clients

Factors Considered	No. of Respondents	Percentage
Skills and experience	10	20%
Oral Communication	4	8%
Job requirement	7	14%
All of the above	29	58%
Total	50	100%

Graph No. 4.6 - Graph Showing the Factors Considered by HR While Shortlisting Candidates for Clients

Interpretation :

The data shows that, HR professionals consider multiple factors when shortlisting candidates. About 58% evaluate skills, experience, and job match together, while 20% focus mainly on skills and experience. Communication is considered by 8% of HRs. This approach ensures candidates are matched effectively with client requirements and enhances the quality of selections.

Table No. 4.7 - Table Showing the Most Frequently Used Platforms to Find Candidates

Platform Used	No. of Respondents	Percentage
Job portals	25	50%
LinkedIn	4	8%
Internal database	7	14%
Referrals	14	28%
Total	50	100%

Graph No. 4.7 - Graph Showing the Most Frequently Used Platforms to Find Candidates

Interpretation :

The study reveals that, job portals are the most commonly used platform, with 50% of HRs using them for sourcing candidates. Referrals account for 28%, and internal databases are used by 14%. This indicates a balanced mix of modern and traditional sourcing methods to reach a diverse pool of candidates.

Table No. 4.8 -Table Showing the Tools Used for Maintaining Candidate Data

Tool Used	No. of Respondents	Percentage
Google Sheets	26	52%
Microsoft Excel	22	44%
Recruitment software	2	4%
Total	50	100%

Graph No. 4.8 - Graph Showing the Tools Used for Maintaining Candidate Data

Interpretation :

The results reveal that, 52% of HR professionals use Google Sheets, 44% use MS Excel, and only 4% use recruitment software. This indicates that HRs prefer simple and accessible data management tools. The high use of spreadsheets shows a cost-effective approach toward record maintenance. Spreadsheets remain the preferred tool for convenience and efficiency.

Table No. 4.9 -Table Showing Preferred Mode of Contacting Shortlisted Candidates

Mode of Contact	No. of Respondents	Percentage
Phone calls	11	22%
WhatsApp	4	8%
Emails	5	10%
All of the above	30	60%
Total	50	100%

Graph No. 4.9 - Graph Showing Preferred Mode of Contacting Shortlisted Candidates

Interpretation :

A study shows that, 60% of HR professionals use all communication modes such as calls, WhatsApp, and emails. Around 22% prefer calls alone, while 8% rely on WhatsApp. This reveals that multi-channel communication ensures better candidate engagement. Combining various methods helps speed up recruitment communication.

Table No. 4.10 - Table Showing Support Provided by HR in Resume Improvement.

Resume Support Method	No. of Respondents	Percentage
Sharing resume samples	15	30%
Editing their resume	12	24%
Suggesting changes verbally	23	46%
No assistance	0	0%
Total	50	100%

Graph No. 4.10 - Graph Support Provided by HR in Resume Improvement.

Interpretation :

The data shows that, 46% of HRs provide verbal suggestions, 30% share resume samples, and 24% edit resumes directly. This demonstrates active guidance in helping candidates present themselves professionally and improve their chances in interviews.

Table No. 4.11 - Table Showing HR Focuses on Improving Skills among Job Seekers.

Type of Skills	No. of Respondents	Percentage
Communication Skills	17	34%

Total	50	100%

Graph No. 4.13 - Graph Showing Follow-Up Methods Used by HR After an Interview.

Interpretation :

The Study shows that, 40% HR professionals follow up through calls, another 40% through systematic processes. About 12% wait for client feedback before following up. This professional follow-up maintains coordination and keeps candidates informed.

Table No. 4.14 -Table Showing Type of Support Provided to Candidates After Selection

Support Provided	No. of Respondents	Percentage
Offer letter guidance	2	4%
Onboarding coordination	2	4%
Regular follow-up	16	32%
All of the above	30	60%
Total	50	100%

Graph No. 4.14 - Graph Showing Type of Support Provided to Candidates After Selection**Interpretation :**

The data shows that, 60% of HRs provide all types of post-selection support, including offer letter guidance and onboarding assistance. Around 32% offer regular follow-up, and 4% focus on specific guidance. This reflects HR's role in ensuring smooth transitions after selection.

Table No. 4.15 - Table Showing Guidance Provided to Candidates Throughout the Recruitment Process.

Response	No. of Respondents	Percentage
Yes, every time	30	60%
Only when needed	11	22%
Rarely	9	18%
No	0	0%
Total	50	100%

Graph No. 4.15 - Graph Showing Guidance Provided to Candidates Throughout the Recruitment Process.

Interpretation :

The table shows that, 60% of HR professionals guide candidates every time during the recruitment process, while 22% provide guidance only when needed. Around 18% rarely offer support, and none completely avoid it. This indicates that most HRs actively ensure candidates are well-prepared and confident. Overall, it highlights the strong involvement of HRs in assisting candidates at every stage for better hiring outcomes.

Table No. 4.16 - Table Showing Clarity in Explaining Job Responsibilities and Client Expectations to Candidates.

Response	No. of Respondents	Percentage
Yes, in detail	36	72%
Only basic information	4	8%
Depends on the candidates	10	20%
Not always	0	0%
Total	50	100%

Graph No. 4.16 - Graph Showing Clarity in Explaining Job Responsibilities and Client Expectations to Candidates

Interpretation :

The data shows that, 72% of HRs explain job roles and client expectations in detail, 8% provide basic information, and 20% adjust explanations according to the candidate. Clear communication ensures candidates are well-informed and reduces mismatches in the recruitment process.

CHAPTER 5

FINDINGS

The following are the key findings derived from the survey conducted among HR professionals at Career Point Placement Services (CPPS). The results highlight the recruitment practices, communication methods, and HR initiatives that help bridge the gap between job seekers and employers.

- 1) It is found that, 40% of HR professionals are 25-34 years, 34% are below 25, showing a young and active HR team.
- 2) It is found that, 62% of respondents are female and 38% are male, indicating higher female participation in HR roles.
- 3) It is found that, 34% of HRs have less than 1 year experience, 30% have 1-3 years, reflecting a mix of fresher's and experienced staff.
- 4) It is found that, 28% are Talent Acquisition Managers, 24% are Trainee Executives, showing a balanced HR structure.
- 5) It is found that, 72% collect job requirements through email, 10% via calls, indicating preference for clear and quick communication.
- 6) It is found that, 58% of respondents consider all factors such as skills, experience, communication, and job match while shortlisting candidates, showing a holistic approach.
- 7) It is found that, 50% of respondents use job portals most frequently to source candidates, followed by LinkedIn, internal databases, and referrals, highlighting reliance on online platforms.
- 8) It is found that, 52% use Google Sheets and 44% use Excel, indicating that low-cost and easy-to-use digital tools are preferred for managing candidate data.
- 9) It is found that, 60% contact candidates using all channels, 22% via phone, reflecting multi-channel communication for better engagement.
- 10) It is found that, 46% suggest resume changes verbally and 30% share samples, showing active guidance in candidate resume improvement.
- 11) It is found that, 52% of HRs focus on all skills such as communication, technical and soft skills, showing that HRs aim to make candidates well-rounded and job-ready.

- 12) It is found that, 60% of HR professionals provide support such as sharing job role details, preparing with basic questions, and sharing company background. This shows that most HRs take a holistic approach to pre-interview preparation.
- 13) It is found that, 40% follow up through calls and another 40% through systematic tracking, showing a structured and timely approach to interview coordination.
- 14) It is found that, 60% provide complete support, including offer letters and onboarding guidance, showing long-term involvement in candidate placement.
- 15) It is found that, 60% guide candidates at every stage, proving that HR at Career Point is highly supportive and involved in ensuring placement success.
- 16) It is found that, 72% explain job roles in detail, reducing mismatch and increasing candidate confidence before interviews.

CHAPTER 6

CONCLUSION

From the study it can be concluded that the Human Resource (HR) department at Career Point Placement Services plays a crucial role in connecting job seekers with recruiters effectively. The findings clearly show that HR professionals act as facilitators by understanding client requirements, identifying suitable candidates, and preparing them through resume support, interview training, and skill enhancement sessions.

It was observed that a majority of HR executives regularly communicate with clients through emails and follow-ups to stay updated on job openings. Most candidates are sourced from job portals and referrals, ensuring a wide talent reach. The use of tools like Excel, Google Sheets, and internal databases reflects a systematic approach to data handling and candidate tracking.

The study also highlights that HR not only focuses on technical qualifications but also on improving soft skills, communication, and interview readiness of job seekers. Continuous support before and after placement helps ensure that candidates adapt well to their new roles, leading to higher satisfaction for both recruiters and employees.

Overall, the research concludes that Career Point Placement Services has successfully established a strong HR-driven process that bridges the gap between job seekers and recruiters by maintaining transparency, providing proper guidance, and fostering long-term professional relationships.
